

ENERGY RESOURCES

PowerSouth's Mission: Safely deliver reliable, competitively priced wholesale power to promote development of the communities its members serve. In keeping with this commitment, PowerSouth relies on a diverse blend of generating resources, including fossil fuels, renewables and, soon, nuclear.

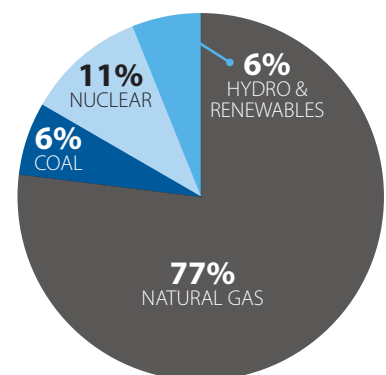

2014 Energy Sources (Actual)

2020 Energy Sources (Projected)

2026 Energy Sources (Projected)

The evolution of PowerSouth's energy mix since 2014 includes less reliance on coal, increased natural gas production, and, by 2026, the addition of nuclear and more renewable resources like solar.

OWNED GENERATING RESOURCES:

Central Generation

Gantt, Alabama

NATURAL GAS & HYDRO

738 megawatts

Lowman Energy Center

Leroy, Alabama

Under Construction

NATURAL GAS

693 megawatts

McIntosh Power Plant

McIntosh, Alabama

NATURAL GAS & COMPRESSED AIR

ENERGY STORAGE

794 megawatts
